Abstract of the Disclosure

A peripheral communications protocol hub includes an input device such as a keyboard or remote cursor control wirelessly connected to a host computer. The input device has a number of connectors for connection of peripherals to the input device. The connection of input device to peripheral may be wired or wireless.

I hereby certify that this paper or fee is being deposited with the United States Postal Service "Express Mail Post 10 Office to Addressee" service on the date indicated above and is addressed to the Assistant Commissioner for Patents, Attn: Box Patent Application, Washington, D. C. 20231.
